

Intermediate HL7

Overview

This one day course provides an intensive introduction to HL7 Version 2.

It provides the skills and knowledge for project management and implementation processes.

Learning Objectives

At the end of this course you should be able to describe:

- the basics of HL7 messaging
- what is the future of healthcare messaging
- a basic understanding of the technical aspects of the HL7 processes and procedures
- an understanding of the technical aspects of HL7 implementations
- ability to effectively scope, plan and implement an HL7 project

Who should attend?

This is an intensive one-day course designed for a non-technical audience such as, analysts and contract managers who want a strategic understanding of HL7 and the implementation process.

Pre-requisites

A basic understanding of health care IT is assumed. This course is suitable for those with little technical knowledge.

Tutors

Chris Lynton-Moll and Jane Gilbert are from the Collaborative Centre for eHealth at the University of Ballarat. Chris has been involved in HL7 implementations for the last 10 years and is Manager of the Collaborative Centre for eHealth. He is co-chair of Standards Australia Working Group IT 14-6-5, Diagnostic Messaging and is Hon Secretary of HL7 Australia Board. Jane is Senior Software Engineer at the Collaborative Centre for eHealth and Project Manager of Australian Healthcare Messaging Laboratory. Jane has been actively involved in HL7 messaging for the last 5 years through her work on interface projects and standards development with Standards Australia.
